

DESERT RHINO EXPEDITION

NAMIBIA

A Trails Exploration - Seven nights/ Eight days

For more than 20 years, the Save the Rhino Trust (SRT) has worked to protect the last free-ranging rhino population on Earth: the endangered desert-adapted black rhino. In the remote, rugged Palmwag Concession, local trackers use camel trains to help research and monitor this animal. On this original Exploration, guests join these “ships of the desert” on an eight-day walk across the oldest desert in the world, where a camel train and a team of SRT trackers penetrate deep into the heart of the Namib Desert in search of this rare species, as well as the unique desert-adapted elephant and other spectacular desert life. The revenues generated by this venture are channelled into this vital rhino conservation project.

BRIEF ITINERARY:

- Day 1:** Arrive and overnight at Palmwag Lodge
- Day 2:** Early morning drive north to Mbakondja Camel Camp to meet the Save the Rhino Camel Team, then walk south to and overnight near the Aub River
- Day 3:** Walk out west towards the Barab River
- Day 4:** Head west again towards Okomutati and Kudu Springs
- Day 5:** Travel to Hunkab Spring and overnight in Adventure Camp
- Day 6:** Bid farewell to camels and SRT trackers and transfer by vehicle to Hoanib Camp
- Day 7:** Hoanib Camp, Kaokoland
- Day 8:** Fly back to Palmwag Lodge in time for lunch
